CHIFUNABULI DISTRICT

CHITEMBO PRIMARY SCHOOL

LESSON PLAN

TEACHER: Lidya chola	**DATE:**	**Att: (BOYS:**	**GIRLS:** .....)
YEAR/TERM 2026 / TERM 3	**TIME:**	**DURATION:**	

GRADE: Grade 1

SUBJECT: Mathematics and Science

TOPIC: 1.4 EXPLORING MATERIALS

SUB-TOPIC: 1.4.4 Safe Water

GENERAL COMPETENCES:- Develop scientific inquiry skills

- Promote healthy living practices

SPECIFIC COMPETENCES:- 1.4.4.1 Use safe and clean water

LESSON GOAL: By the end of the lesson, learners will be able to identify sources of safe water and demonstrate methods to make water safe for drinking to prevent waterborne diseases.

RATIONALE: This lesson is vital for teaching learners how to identify and treat water, preventing diseases like cholera and dysentery. It uses teacher exposition, demonstration, and collaborative group work to ensure active participation through the gradual release model. This is Lesson 5 in Week 5.

PRIOR KNOWLEDGE/SKILLS/VALUES:

- **Knowledge:** Learners know that water is used for drinking and washing.
- **Skills:** Learners can identify different containers used for water.
- **Values:** Learners appreciate the importance of cleanliness.

TEXTBOOK REFERENCES:

- Grade 1-3 lower primary Mathematics and Science CDC 2024-2025 CBC syllabus page 95

TEACHING AND LEARNING RESOURCES / MATERIALS:

- Clean and dirty water samples- Boiling pot/kettle
- Filtering cloth. - Chlorine/Water treatment tablets

LEARNING ENVIRONMENT:

Natural: Local water sources like wells or streams.

Artificial: Classroom setting with water containers.

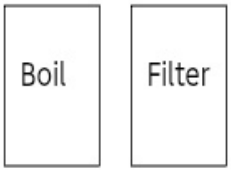

Technological: None.

LEARNING ACTIVITIES:- Activity 1e: Making water safe to drink

EXPECTED STANDARD: Safe and clean water used accordingly.

LESSON DEVELOPMENT

STAGES	TEACHER'S ACTIVITIES	LEARNERS' ACTIVITIES	CONTENT	ASSESSMENT CRITERIA
INTRODUCTION	* Teacher to display samples of clear and murky water. * Teacher to ask learners to identify which water is safe to drink.	* Learners to observe the water samples. * Learners to respond to the teacher's questions about water safety.	Water Safety Awareness * **A) Safe:** Clear, odorless, treated. * **B) Unsafe:** Murky, debris, bad smell.	* Learners identify safe water correctly.

LESSON DEVELOPMENT	* Teacher to demonstrate boiling and filtering methods. * Teacher to explain the importance of treating water to kill germs.	* Learners to observe the demonstration closely. * Learners to repeat the steps for making water safe.	Methods of Water Treatment  * **A) Boiling:** Kills germs. * **B) Filtering:** Removes dirt.	* Learners describe the treatment steps.
PRACTICE/ APPLICATION	* Teacher to organize learners into small groups. * Teacher to provide materials for groups to simulate water treatment.	* Learners to work in groups to practice filtering. * Learners to discuss why we treat water.	Collaborative Treatment Task * **Group Task:** Use cloth to filter water. * **Discussion:** Why treat water? (To prevent Cholera, Dysentery).	* Learners participate in group work.
EXERCISE	* Teacher to write questions on the board. * Teacher to supervise individual work.	* Learners to answer questions in their notebooks. * Learners to draw a water filter.	Written Exercise * 1. Name two ways to make water safe. * 2. Why do we boil water? * 3. Draw a boiling pot.	* Learners complete the task accurately.
CONCLUSION	* Teacher to summarize the lesson. * Teacher to ask reflection questions.	* Learners to summarize the key points. * Learners to answer final questions.	Summary * **Key Points:** Boiling, Filtering, Treating. * **Reflection:** What happens if we drink dirty water?	* Learners recall key concepts.

Homework:

1. Ask your parents how they make water safe at home.
2. Draw a picture of a clean water container.

Instructions: Step-by-step: 1. Discuss with family. 2. Draw in your book. 3. Bring your book tomorrow. **Due:** Next Lesson
